

TRUE REAL-TIME SAP INTEGRATION FOR SALESFORCE

Vigience's Overcast product connects Salesforce to the on-premise world and offers a simple solution for the most advanced Salesforce to SAP integration requirements. This is achieved via ready-to-use "SAP Components" combined with click-to-configure integrations.

VIGIENCE OVERCAST SOLUTIONS

SAP-INTEGRATED CUSTOMER 360

Get a true end-to-end 360-degree view of your customer. Access real-time SAP order, invoice, and delivery data, quote history, pricing details, and more – all without leaving Salesforce.

SAP-INTEGRATED QUOTES AND ORDERS

Post and track SAP sales orders, perform available-to-promise checks (ATP), monitor invoices and payments. Create quotes based on SAP VC, pricing and SAP business rules in Salesforce.

SAP-INTEGRATED MANUFACTURING CLOUD

Get transparency into your sales agreements with real-time insight into order run rates, live SAP pricing and SAP-integrated demand forecasting.

SAP-INTEGRATED FIELD SERVICE

Connect Salesforce field service solutions to SAP. Ensure spare parts are available and either shipped to the customer site or moved to van stock. After service is performed, invoice parts and time used in SAP.

SAP-INTEGRATED SELF-SERVICE COMMUNITIES

Connect business partners through self-service portals to your SAP system. Customers and agencies can access personalized quotes, orders and payment history, place orders and do much more.

SAP-INTEGRATED CONSUMER GOODS CLOUD

Connect SAP master data including accounts, stores, products and customer price lists to the CG cloud and post sales orders from the store visits back to SAP.

Overcast Integration App

The Overcast Integration App is a Salesforce-native app to integrate Salesforce with on-premise systems. Unlike Mulesoft and SAP CPI (aka SAP PI / SAP PO), Overcast is not another Integration PaaS to build APIs and extract master data. Instead, Overcast provides ready-to-use SaaS business applications consisting of Lighting Components (UI), integration & business logic and real-time SAP-connectivity that can be installed into Salesforce. Leverage 30+ pre-built, deep SAP integration components to enable end-to-end business processes across Salesforce and SAP or configure your own custom integrations against any backend.

Overcast is a Vigience product

Vigience is a Salesforce ISV partner servicing customers around the globe, e.g. Honeywell, Mitsubishi Electric, Russell Stover in the US; TEPCO, Hitachi, Sumitomo in Japan; and FOSS, Cosentino, Swissbit in Europe.

Customers & References

Overcast Benefits

- ✓ Overcast greatly reduces complexity and risk, and cuts project costs/time up to 75%
- ✓ Overcast is the only solution that enables deep process integration with SAP without SAP installations or coding
- ✓ Overcast natively provides true real-time and data sync integration to SAP, without SAP NetWeaver or other middleware
- ✓ Overcast Lightning Components provide many typical SAP integration scenarios out-of-the-box
- ✓ Vigience partners with our customers for their success
